I will instruct John to send out MCHM standard and hold off on PPh; unless instructed otherwise.

Cindy,

From what I've learned from Justin Young he cannot ship out this material or it will be extremely difficult to ship it through him because he is certified to ship haz materials by air only and the regs to ship by air are prohibitively complex.

I can however ship the MCHM since it is not considered a hazardous material according to the DOT. The PPH I cannot ship and will have to wait for Susan Shinn to figure out.

Would you like me to ship out the MCHM only?

If we have enough to send both MCHM and PPh then send both. Priority is MCHM.
